In accordance with Article 73, para. 73.2, subpara. a) of the Rules, in the week W+1, on Monday morning by 11:30 am, GME will define and notify to each Market Participant its own debit or credit net position, resulting from the purchase and sale transactions concluded on the MGAS and delivered in the week W, including VAT, where applicable.

2.3. Settlement of the net position resulting from the MGAS

2.3.1. Payments provided by net debtor Market Participants, defined as Public Administration in Article 1, para. 209 of Law no. 244 of 24 December 2007 (PA Market Participants)

After the individuation of net positions described in para. 2.2 above and the invoicing process described in the following para. 2.4.4, GME will settle PA Market Participants' net debt positions by using the non-interest bearing cash deposit granted by the PA Market Participants as a guarantee, pursuant to Section 70 paragraph 70.2 bis, accordingly to Technical Rule 15 MGAS.

In accordance with Article 18, para. 18.5 of the Rules, each Market Participant subscribes and sends the SEPA Direct Debit Mandate B2B to the financial Institute in charge of the Gas Market treasury services, previously transmitted by GME and then properly filled by the Market Participant itself.

By the financial Institute in charge of the Gas Market treasury services, GME, as the authorized creditor, collects and preserves the mandates signed and submitted by all Market Participants.

GME will take into account only those mandates transmitted directly by the Market Participants to the financial Institute providing the Gas Market treasury services, as shown in the present Technical Rules.

Once acquired the mandate duly filled in all its parts, GME, through the financial Institute providing Gas Market treasury services, will perform an opening test¹ of the SDD B2B transmission channel with the bank identified in the mandate, by a charge of a token amount. Since the working day following the opening of the banking channel, the Market Participant can enter bids/asks in the

¹ The banking system provides a 14-day working calendar timing only for the first charge and then it's required to add three working days for subsequent interbank checks. Subsequent charges will be settled on the interbank day (Target) following the dispatch of the SDD B2B provisions by the Institute entrusted of the Gas Market treasury services.

MGAS; the amount used for the test purposes will be returned to the Market Participant by GME via Urgent SEPA Credit Transfer or Priority.

If in a following time, the Participant decides to change the bank account identified in the mandate submitted in accordance with Article 18, para. 18.5 of the Rules, a communication on the Participant's Company letterhead signed by the legal representative must be sent via fax 0039 06 80124589 to the GME requesting GME the change of the mandate.

Then, GME will send the Participant a new mandate that will have to be duly filled in all its parts and then to be transmitted both to the financial institution identified by the participant and to the financial Institute in charge of the GME's Electricity Market treasury services.

The new mandate, submitted to replace the one already in force, will be considered accepted only once the SDD B2B channel opening test will be successfully concluded by GME. Only then, the Participants will be able to use the new account to operate in the market/platform managed by GME and financially settled through the SDD B2B scheme. During the time needed to open the banking channel, the Participant can operate using the previous mandate.

2.3.3. Settlement of payments by the non-PA Market Participants that are net debtors

If GME does not receive the payment described in Article 74, para. 74.2 of the Rules within the period defined in para. 2.3.3 above, in accordance with Article 78, para. 78.1, subpara. b) of the Rules, GME will enforce the guarantees set by the Market Participant in compliance with Article 70, para. 70.1, 70.2 and 70.2bis of the Rules within the following working day and will pay pro quota the residual net debt on the basis of the amount collected upon redemption, within 5 working days starting from the date of collection. 6. Common provisions

6.1. Invoices issued by GME

GME's invoice consists of an XML file and a PDF file, except for the invoices relating to the access fee and the penalty which are produced in paper/pdf form and sent by email/ or ordinary mail. The xml file is provided to Market Participants through the "SET Service" platform, displayed with the style sheet known as Style-Sheet "FatturaNew". According to the volume of purchase transactions performed by the Market Participant, GME may also issue more than one invoice, using the same technical procedures described below.

The following is a brief description of the XML layout used by GME in invoicing procedure. The xml file is an electronic medium, consisting of fields and sets of fields, whose data can be directly processed.

The invoice file in XML format includes 6 sets of fields:

- a. The <Fattura> (invoice) set, i.e. the one with the highest hierarchical level, corresponding to the overall invoice;
- b. The <HeaderFattura> (invoice header) set, inside the <Fattura> set, consisting of fields with accounting and taxation references, as well as the identification data of the issuer and of the recipient;
- c. The <Summary1> set, inside the <Fattura> set, having the same hierarchical level as <HeaderFattura>; this field displays: the data grouped by VAT rate applied to the invoiced transactions and, separately, the taxable amount (<AMOUNT>), the code of the applied VAT rate (<TAX_CODE>), the tax amount (<TAX_AMOUNT>); the total amount (<TOTAL_AMOUNT>), the VAT rate (<TAX_RATE>), and the volume in MWh (<QUANTITY>);
- d. The <Summary2> set, inside the <Fattura> set, having the same hierarchical level as <HeaderFattura>; this field displays: the data grouped by market and by VAT rate applied to the invoiced transactions and, separately, the taxable amount (<AMOUNT>), the code of the applied VAT rate (<TAX_CODE>), and the volume in MWh (<QUANTITY>);

- e. The <ElencoLinee> set, inside the <Fattura> set, having the same hierarchical level as <HeaderFattura> and consisting of multiple subsets, each dedicated to the individual transaction making part of the invoice;
- f. The <Linea> set, inside the <ElencoLinee> set, showing the detailed data of each transaction part of the invoice.

In addition, the invoice for PA Market Participants is also sent through the Interchange system (SDI) or through alternative channels to SDI if there are the conditions envisaged by the Law no. 244 of 24 December 2007 and related implementations.

6.2. Invoices received by GME

To allow the Market Participants selling on the gas market, GME issue one or more XML files, ready to be converted into Market Participants' invoices.

The layout of these files is identical to the one of GME's invoice files. As obvious, the sets of lines describing the identification and tax data of the issuer and of the recipient will be different, because in this case the issuer of the invoice is the Market Participant and the recipient is GME. The fields that have differences with respect to GME's invoice file are as follows:

- a. <DOCUMENT>C</DOCUMENT>, in this field, the code C = notification is used instead of F = invoice;
- b. <TRX_TYPE>OFF</TRX_TYPE>, in this field, the code OFF = sale to GME is specified instead of BID = purchase from GME;
- c. <INVOICE_NUMBER>_</INVOICE_NUMBER>, this field is blank because the registration code of the invoice is to be assigned by the Market Participant;
- d. <INVOICE_DATE>_</INVOICE_DATE>, this field is blank because the issuing date of the invoice is to be assigned by the Market Participant;

The conversion of GME's notification into a Market Participant's invoice to be made available to GME, requires three steps:

- a. replacing C with F in the field; this means that it is an invoice and not a mere reuse of GME's notification;
- b. filling the <INVOICE_NUMBER> field;

- c. filling the < INVOICE_DATE > field according to the *yyyymmdd* format. For instance, if the date of 5 May 2010 is to be specified, then the format will be 20100505;
- d. filling the optional <INVOICE_NOTE1> field with any communications that the Market Participant wishes to make to GME.

6.3. How to send the XML files

The XML files with notifications and invoices will be provided on the “SET Service” electronic platform under the procedures described in the specific user manual posted on GME’s website (www.mercatoelettrico.org).

Moreover, the invoice for PA Market Participants is also sent via SDI or through alternative channels to SDI according to the conditions envisaged by the Law no. 244 of 24 December 2007 and related implementations.

6.4. How to settle the payments

All payments from GME to Market Participants and vice versa, identified in paras. 2.3.4, 3.2.6.1, 3.2.6.2 and 4.6 will be made by SEPA Credit Transfer, Priority or equivalent procedures. GME’s IBAN code to be used for the money transfer is posted on GME’s website (www.mercatoelettrico.org). If time limits for payments provided in paras. 2.3.4, 3.2.6.1 and 3.2.6.2 and 4.6 falls on a non-working day, both GME’s payments to Market Participants and Market Participants’ payments to GME will be made within the next first working day.
